## About Dr. Carlos G.

Dr. Carlos G. is a motivated and clinically confident general dentist with a strong focus on restorative and prosthetic dentistry. He graduated in Dental Medicine from the University of Medicine and Pharmacy “Carol Davila” in Bucharest and has since gained solid experience working in well-structured private dental clinics, both in Romania and internationally.

Carlos is known for his precision, structured clinical approach, and strong attention to detail. He places great emphasis on correct diagnosis, thorough treatment planning, and high-quality execution of restorative and prosthetic treatments. His daily clinical work includes direct restorations under rubber dam, prosthetic rehabilitations, and the management of dental emergencies, allowing him to build both technical confidence and efficiency in practice.

An important part of Carlos’s professional development was his exchange experience in the Netherlands, where he worked alongside various dental specialists. This experience familiarized him with Dutch clinical workflows, interdisciplinary collaboration, and high standards of patient communication and documentation. It also strengthened his adaptability and understanding of different healthcare systems.

Carlos values continuous professional development and regularly invests in advanced training, particularly in prosthodontics and esthetic dentistry. On a personal level, he leads an active and health-conscious lifestyle and enjoys cycling, running, and outdoor activities. He is enthusiastic about becoming part of a culture that shares these values and looks forward to exploring the Netherlands — from cycling through the countryside to discovering new cities and regions. He thrives in organized, modern clinical environments where quality, collaboration, and patient-centered care are central.
